

An Open Letter on Energy to Our Guests from Around the World

Welcome to Pittsburgh, a community that has made remarkable progress in transforming our economy, our environment and our quality of life. You will discover that much has been made possible by an unusual spirit of collaboration. That spirit is alive and well today among the hundreds of organizations in our region that are working together to provide the sustainable energy solutions of the future.

As you are well aware, global energy demand is projected to continue to grow. To assure that all economies can offer sustainable prosperity to their people, all of us must learn to use energy more wisely. And we will have to seek innovative approaches to providing energy to meet growing worldwide demand.

As the leaders of Pittsburgh-based corporations and universities working across energy-related sectors, we are committed to finding the solutions to the world's energy challenges.

- With expertise in materials science, engineering, and nuclear energy, Pittsburgh is solving the problems of today by making the extraction and use of traditional energy sources cleaner and more efficient.
- By building on its historic strengths, Pittsburgh is innovating and tackling the energy problems of tomorrow by developing distributed energy generation and delivery models, pioneering intelligent building systems, and finding cost-effective alternative technology solutions.

We believe that Pittsburgh will play a leading role in creating the new energy economy. We each represent different components of a diverse energy industry, including coal, natural gas, nuclear, solar and wind technologies, along with distribution and intelligent building systems. By working together we will deliver sustainable energy solutions.

In Pittsburgh we have proven experience in imagining a better future and making it happen. Together, we look forward to working with you to solve the energy and environmental challenges facing our planet.

Sincerely,

J. Brett Harvey
President and CEO, CONSOL Energy

Aris S. Candris
*President and CEO,
Westinghouse Electric Company*

Murry S. Gerber
*Chairman and CEO,
EQT Corporation*

Charles E. Bunch
Chairman and CEO, PPG Industries, Inc.

L. Patrick Hassey
*Chairman, President and CEO,
Allegheny Technologies Incorporated*

Andrew Hannah
President and CEO, Plextronics

Morgan O'Brien
*President and CEO,
Duquesne Light Company*

Jerry R. Whitaker
*President, Electrical Sector-Americas
Region, Eaton Corporation*

James E. Rohr
*Chairman and CEO,
The PNC Financial Services Group, Inc.*

Jared L. Cohon
*President,
Carnegie Mellon University*

Mark A. Nordenberg
*Chancellor,
University of Pittsburgh*

John P. Surma
*Chairman and CEO,
United States Steel Corporation*
*Chair, Allegheny Conference on
Community Development*
