

COVID-19 Data Summary for the Southwestern Pennsylvania Region

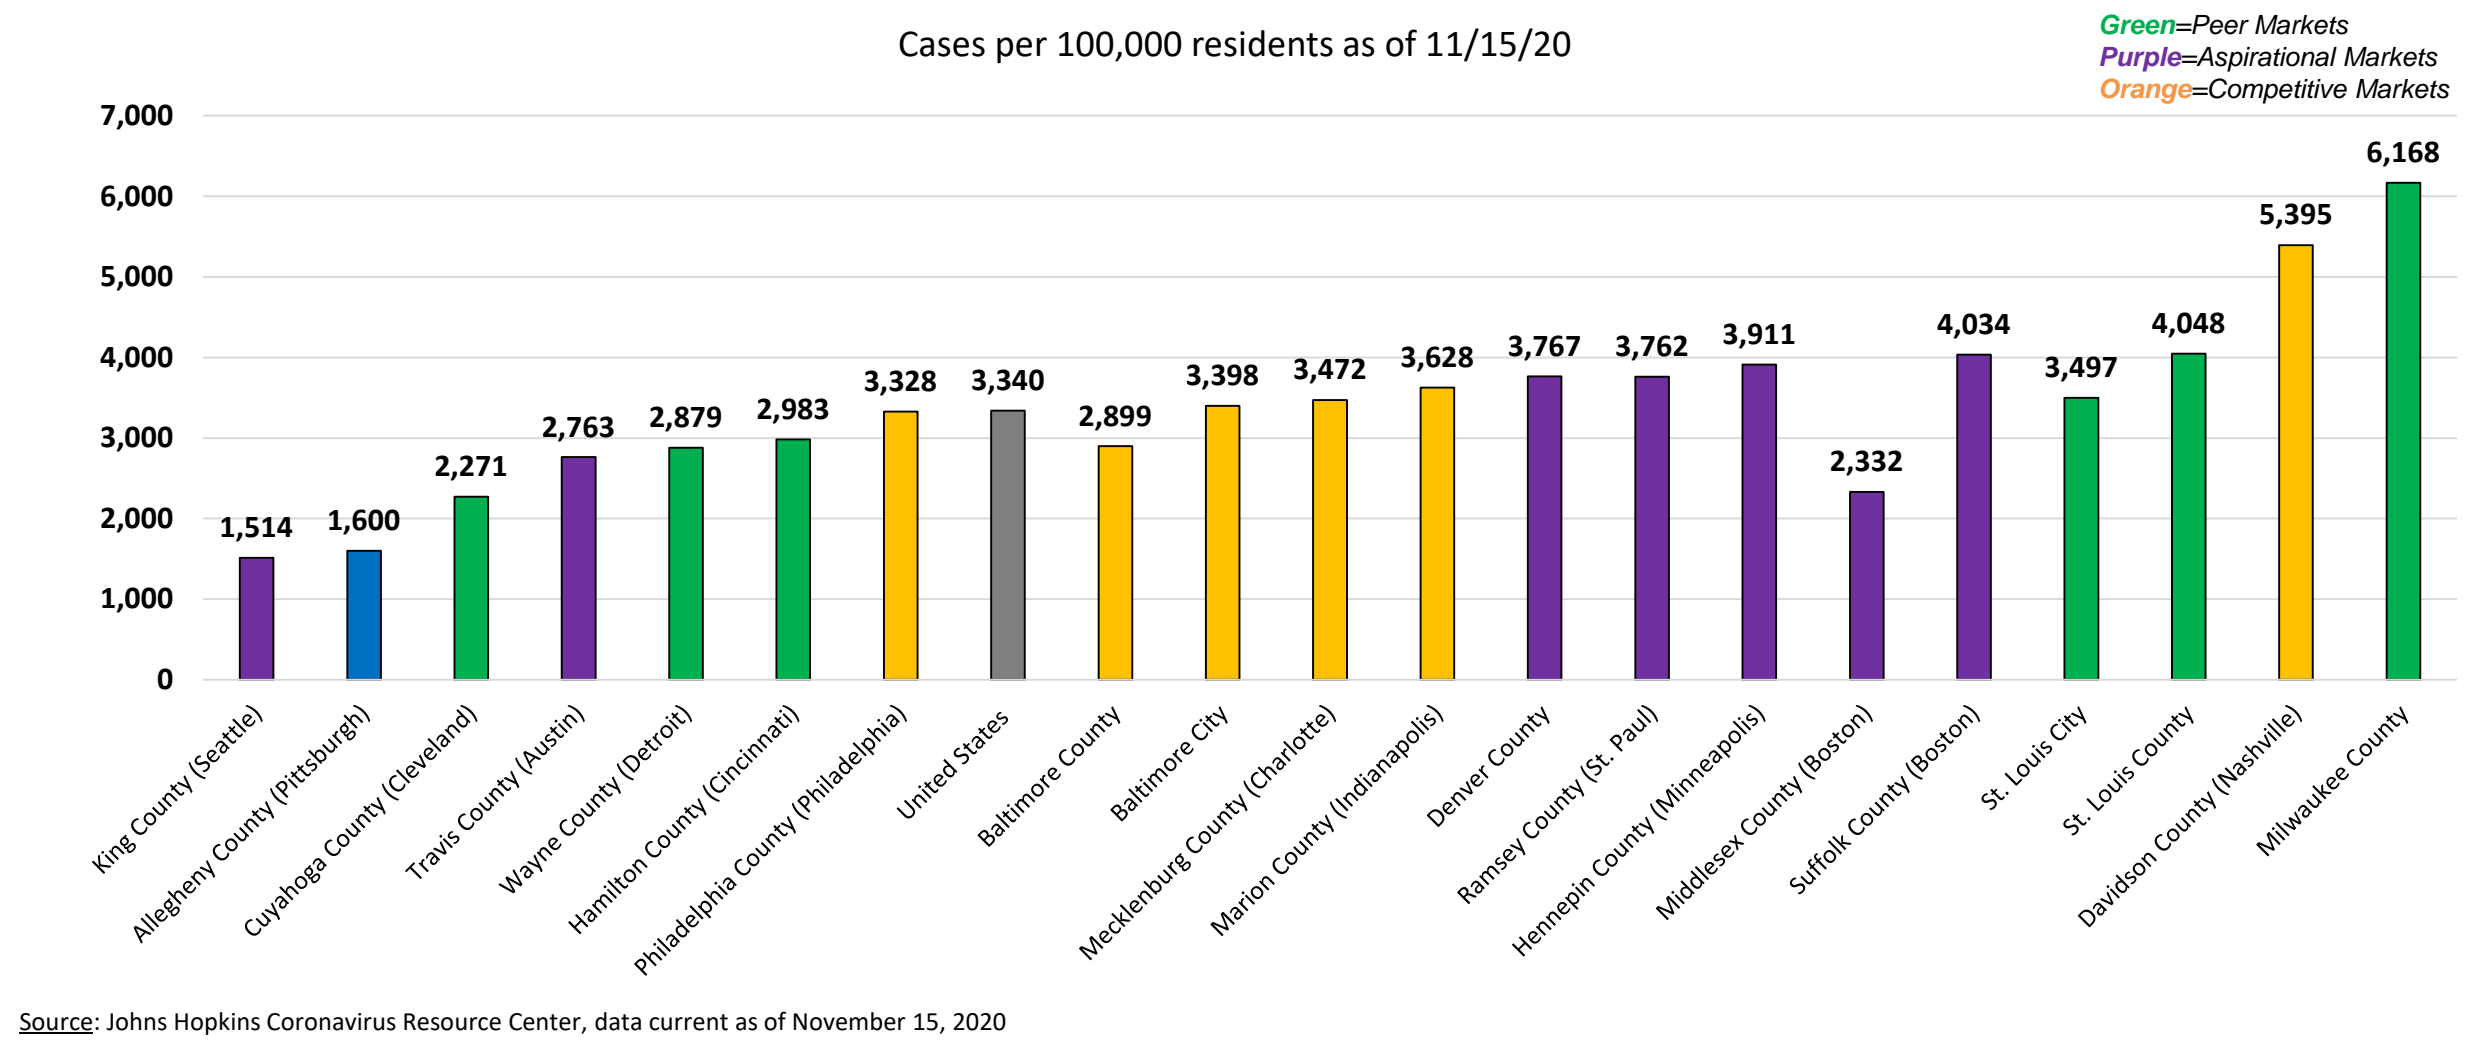

Periods covering October to November

November 17, 2020

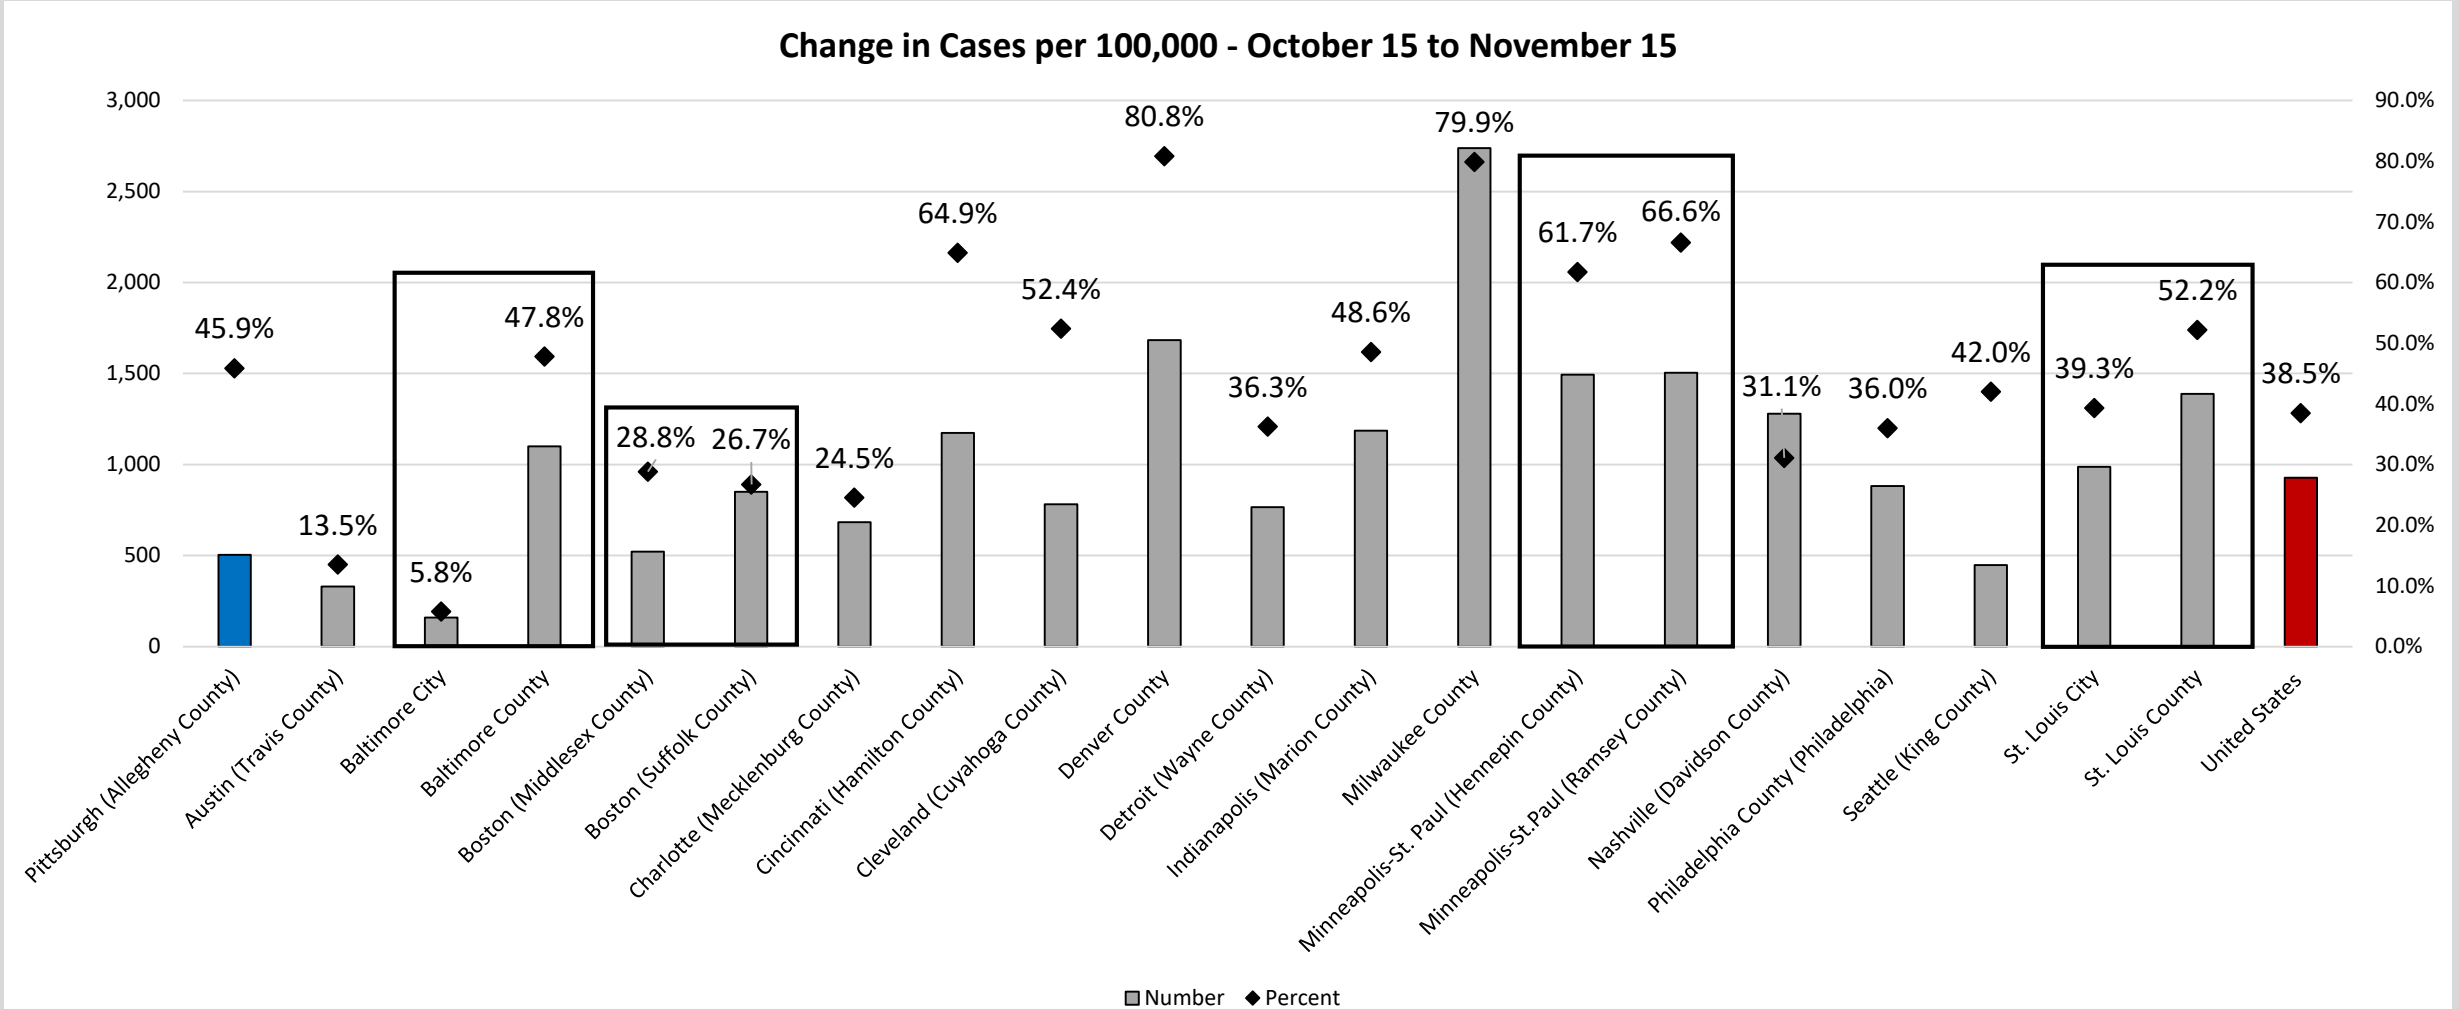

Key Takeaways

- As of Monday, November 15, Allegheny County's rate of COVID-19 cases per 100,000 residents remains less than half the national rate.
- From September to October, the increase in the number of cases per 100,000 in Allegheny County was less than the U.S. and compared favorably against benchmark regions. However, the percentage increase exceeded the U.S. percentage increase.
- Regionally, the rate of new COVID-19 cases over a 14-day period (11/3 to 11/17) has increased 109.0%. Greene, Beaver, and Allegheny have seen the largest increases.
- Daily new cases for the region have increased 123.7% from 11/3 to 11/17.
- In Allegheny County, hospitalizations have increased 14.4% between 11/3 and 11/17, which is an increase from the 14-day hospitalization increase of 7.5% reported in the previous analysis released 10/15/20 analyzing the period between 10/1 and 10/15.

Allegheny County still compares favorably to its benchmark regions in terms of COVID-19 infection rates, although Seattle ranks lower. However, Allegheny County's rate remains less than half the national rate.

On an absolute basis, the increase in the number of cases per 100,000 in Allegheny County from October to November was roughly half the U.S. and was lower than all but two benchmark regions (Austin and Seattle). Furthermore, the percentage increase in cases per 100,000 ranked in the middle of the benchmark regions although it exceeded the national average.

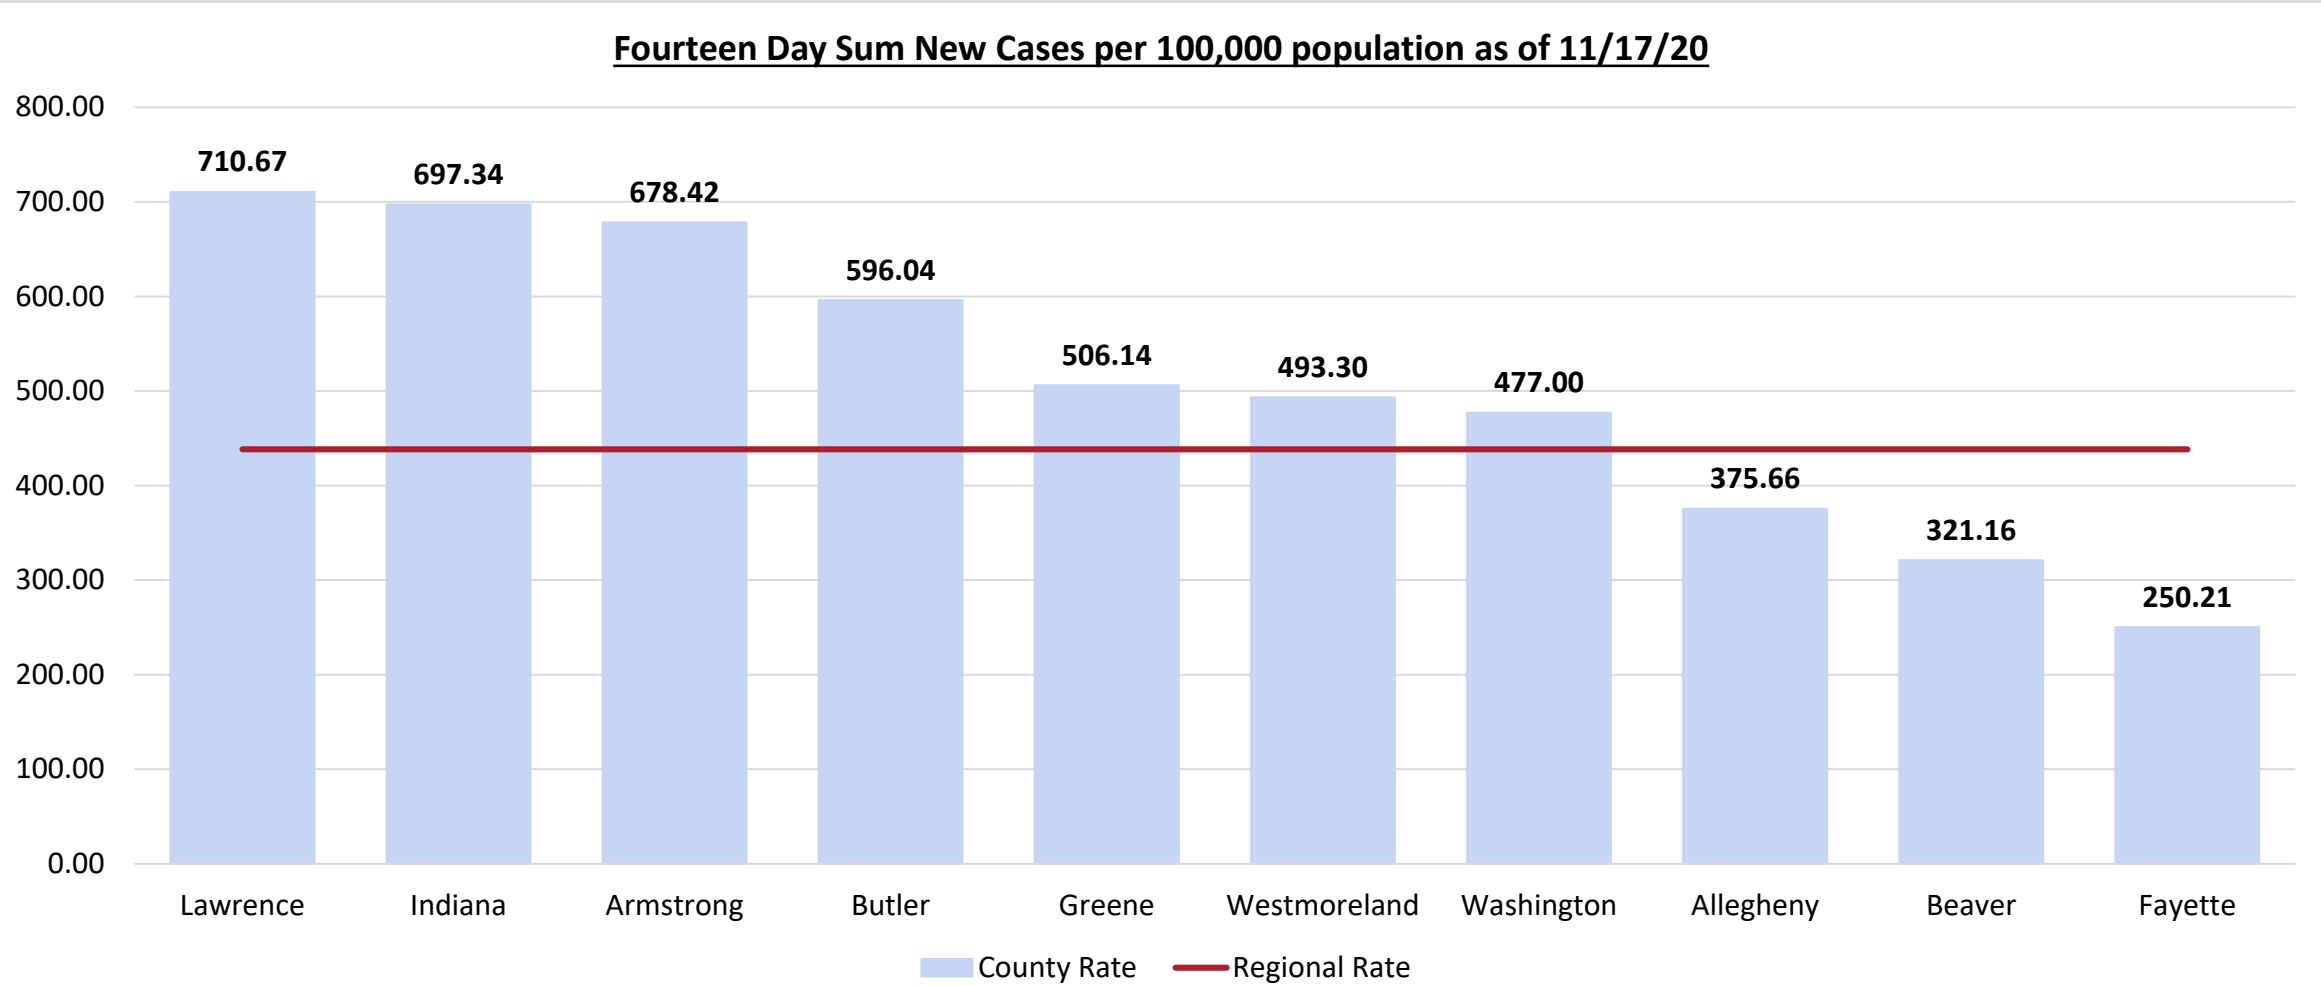

Source: Johns Hopkins Coronavirus Resource Center, data current as of November 15, 2020

All counties in the region have increased new cases of COVID-19 per 100,000 in the fourteen-day period between November 3 and November 17. The regional rate of growth of COVID-19 per 100,000 exceeds the state (109% to 102%). However, six of ten counties within the region are below the regional rate of change.

Source: Pennsylvania Department of Health

As of Tuesday, November 17, regionally, there are 438 new cases of COVID-19 per 100,000 since November 3. Only Allegheny, Beaver, and Fayette counties are below the regional rate of 438.

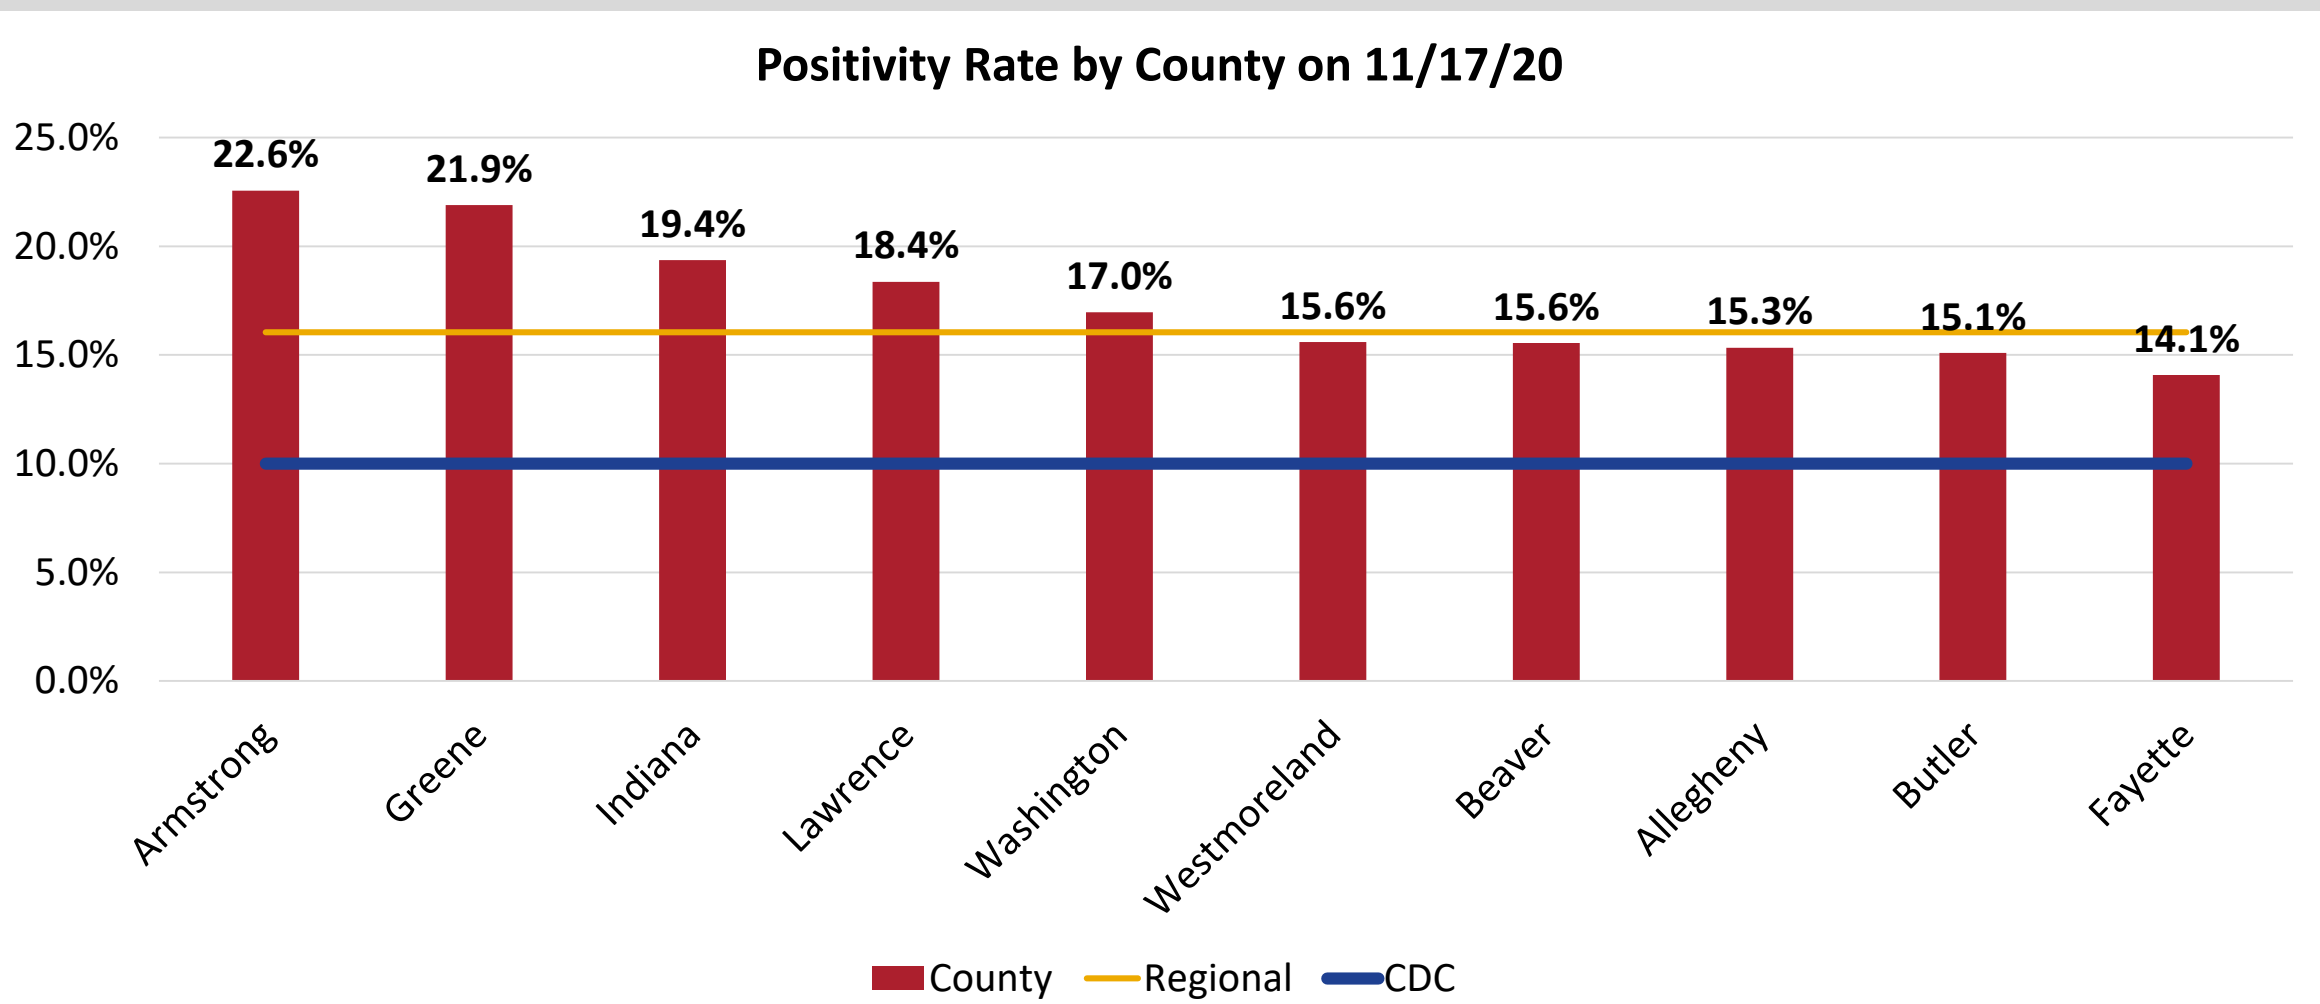

Source: Pennsylvania Department of Health

On Tuesday, November 17, regionally there are 438 new cases of COVID-19 over the past 14 days per 100,000 people. This figure has been increasing dramatically over the past month, and far exceeds the earlier peak of 158 on July 19th. The region exceeded that high point on October 22nd with 161 new cases of COVID-19 per 100,000 people over the 14 days prior.

In May 2020, the Centers for Disease Control and Prevention advised that rates of positivity in testing (percentage of tests that are positive for COVID-19) should remain at 10% or lower for at least 14 days before moving to a less restricted phase of daily activities (ex. business conduct, school attendance). The positivity rate for the region on 11/17/20 is 16%.

Note: Positivity is calculated by determining the rolling 7-day average for new confirmed cases and total tests, which is adapted from the methodology used by the Johns Hopkins Coronavirus Resource Center.
