

Tim Mediate leads an integrated suite of procurement services supporting the deployment of AP1000® Nuclear Power Plants. With a background in Mechanical Engineering, his responsibilities span program management, engineering, quality assurance, project controls, and data management, with a focus on strategic sourcing and supplier development.

With 19 years of experience in the nuclear industry, Tim has played a pivotal role in localizing supply chains and developing new procurement sources for global clients. Under his leadership, teams have successfully delivered equipment and engineered materials valued at over \$10 billion, contributing to the safe and efficient execution of nuclear projects worldwide.
